Workflow Connectors

- *Automated job submission*
- *Workflow integration*
- *Open architecture*

Smart Data

- *Real-time production information*
- *Dynamic production reporting*
- *ONYX Print Data Platform*

ONYX SiteSolutions

Print Production

Modern print shops need reliable high performance technologies that give superior output.

Built for speed on an all 64-bit platform across RIP and applications, ONYX Thrive is the only truly scalable print workflow solution that grows with your business. This end-to-end PDF workflow solution with scalable RIPS and printers includes automation from digital file submission through color management, printing and cutting.

Workflow Connectors

In today's shops, business and production systems need to connect to provide the efficiency and accurate data required to compete.

ONYX Connect provides a simple, open developer interface connecting existing business tools directly with ONYX software. Business owners can create efficient streamlined workflows from job set up to print.

Smart Data

Business owners and production managers need tools to see accurate data about their jobs, costs and productivity.

Onyx Graphics has taken a unique approach to bring real-time data to your entire site. ONYX Hub utilizes data from our innovative Print Data Platform for real-time print production data, ink/media reporting, and job histories, so that business owners can make better decisions to increase profitability.
