

## EMBLEM Solvent Film Matt Monomeric Easy Pin

EMBLEM Solvent Film Matt Monomeric Matt Easy Pin consists of a white monomeric soft PVC foil with a matt finish. This vinyl film is backed with small, evenly spaced adhesive dots. This makes the foil very easy to handle and bubble-free bonding. The foil is covered on the reverse side with a high-quality coated liner.

Matchcode:	<b>SOFOMAMEP</b>
Material:	soft PVC film, monomeric
Finish:	matt
Colour:	white
Thickness:	100 $\mu$ m
Adhesive:	semi-permanent acrylic adhesive
Liner:	siliconised kraft paper, 135 g/m <sup>2</sup> ,
Adhesion:	N/A
Temperature resistance:	-20°C to +65°C
Application temperature:	> +10°C
Standard roll width:	137 cm
Standard roll length:	50 m
Durability:	short term outdoor applications under Central European climate conditions
Storage:	cool and dry at 18-25°C, 40-65% rel. humidity
Shelf life:	12 months in original packing

### COMPATIBLE INKS:

Eco solvent:	yes	UVC:	yes
Solvent:	yes	Latex:	yes

Different printers, inks, resolutions and printing qualities result into numerous different printing parameters. In addition, there are numerous factors influencing processing and the application of our materials. For this reason, we cannot make specific statements as to drying times and maximum ink absorption. For this reason, we recommend you to perform own tests in order to verify the desired results. Our product specifications are not to be understood as legally binding guarantees assuring specific characteristics. Any liabilities and guarantees, as well as claims for compensation beyond the value of the product itself are excluded.

## EMBLEM Solvent Film Matt Monomeric Easy Pin

### Description:

EMBLEM Solvent Film Matt Monomeric Matt Easy Pin consists of a white, soft, monomeric PVC foil with a matt finish. This vinyl film is backed with evenly spaced small adhesive dots. This makes the foil very easy to handle and ensures bubble-free bonding. The back side of the foil is covered with a high-quality coated liner.

A special feature of this foil is the adhesive backing that is covered with small adhesive dots. This makes it possible to avoid the need for tools and prevents air bubbles from forming by using the dry application technique.

Easy Pin media can be readily used as window graphics, for seasonal advertising in retail establishments and for short term use in interior areas. Many smooth surfaces will provide a suitable base for EMBLEM SOFOMAMEP. The semi-permanent adhesive ensures that the sticker is easy to remove from most surfaces and is also easy to reposition as you attach it to your chosen surface. The foil can also be used outdoors for short periods. Its durability depends on the location in which it is applied and is not related to the quality of the print.

### Processing:

Films with Easy Pin adhesive are processed as dry application. Apply the film on flat surfaces. The subsurfaces to be pasted up with the vinyl have to be free of dirt, dust and grease. We advise to check compatibility between adhesive and subsurface - please test before application.

After printing it is necessary to wait for an outright drying and degassing of the print to avoid diffusion of solvents which could damage the adhesive. In order to avoid finger marks, we recommend wearing cotton gloves while using.

### Application:

Typical applications are short term signage and seasonal advertising in retail establishments.
