Standard rolls width:	1067 / 1372 mm
Standard roll length:	50 m
Storage:	cool and dry environment, at 15 - 25 °C, 50 % rel. humidity
Shelf life:	24 month in original packing

COMPATIBLE INKS:

Eco Solvent:	yes	UVC:	yes
Solvent:	yes	Latex:	yes

Different printers, inks, resolutions and printing qualities result into numerous different printing parameters. In addition, there are numerous factors influencing processing and the application of our materials. For this reason, we cannot make specific statements as to drying times and maximum ink absorption. For this reason, we recommend you to perform own tests in order to verify the desired results. Our product specifications are not to be understood as legally binding guarantees assuring specific characteristics. Any liabilities and guarantees, as well as claims for compensation beyond the value of the product itself are excluded.

EMBLEM Solvent One For All Paper Satin 200 Recycled

Description:

EMBLEM Solvent One For All Paper Satin 200 Recycled is a versatile paper, ideal for commercial poster applications that require brilliant colours. With a balanced paper volume, it offers a pleasant feel due to its satin coated surface. Applications range from POS posters to high-quality photo prints. The wood, chlorine and acid-free base paper guarantees long-term stability both indoors and in protected outdoor areas. The paper, part of the EMBLEM SOFAP series, can be printed with commercially available eco-solvent, solvent, latex and UV inks and is praised by users and latex dealers for its high suitability. From an ecological point of view, the SOFAP series is environmentally friendly, PVC- and chlorine-free and FSC-certified.

The 200 g/m² silk matt, recycled, coated paper offers outstanding quality for solvent and latex inks. It is perfect for use in indoor and weather-protected displays for information, communication and advertising. With vivid, colourful and photorealistic images, it creates an impressive effect on posters and graphic reproductions. The paper is made from 100% post-consumer recycled material and offers excellent image quality with a light satin finish and vibrant colours. It is characterised by a fast drying time and is suitable for both hot and cold laminates. It is also FSC® (FSC-C119162) certified and free from acid and chlorine.

Processing:

Unproblematic further processing due to good drying. It can be used in protected outdoor areas if it is not directly exposed to rain, snow and other weather conditions.

Prints should be covered with a laminate to protect them from abrasion. Inadequate drying of the prints can have a negative effect on the adhesive. It is also important to ensure that the print is completely dry and degassed before laminating, as otherwise bubbles may form under the laminate.

Application:

Posters, displays, POS, billboards, signage, indoor and outdoor advertising, exhibition graphics, commercial posters for indoor and outdoor applications
