Standard roll width:	36" / 42" / 50"
Standard roll length:	20 m
Storage:	cool and dry environment in original packing
Flame retardant:	no

COMPATIBLE INKS:

Dye:	yes	Latex:	yes
Pigment:	yes		

Different printers, inks, resolutions and printing qualities result into numerous different printing parameters. In addition, there are numerous factors influencing processing and the application of our materials. For this reason, we cannot make specific statements as to drying times and maximum ink absorption. For this reason, we recommend you to perform own tests in order to verify the desired results. Our product specifications are not to be understood as legally binding guarantees assuring specific characteristics. Any liabilities and guarantees, as well as claims for compensation beyond the value of the product itself are excluded.

EMBLEM WATER RollUp Film - Silverback

Description:

EMBLEM WATER is a special coated PET-film with a good flatness. The high opacity comes from the silver-grey back side. The micro porous coating supports water based ink. The prints are featured by minor reflections and brilliant colours and very good contrast. Every print which has been produced with dye-based ink has to be laminated to protect it against gas-fading. To avoid mechanical influences lamination is advisable at all.

Processing:

Before lamination the print has to be completely dry, otherwise there is the risk of lumps.

The lamination may have influences on the flatness of the film.

The lamination can be done right to edges or over the edges. The user should check before using what is more appropriate.

To avoid fingerprints the use of cotton-gloves is advisable.

Application:

RollUps, displays, poster prints, signs
