

EMBLEM®

EASYPLAN II

The highly efficient and agile automatic hot air welding system for tarpaulins and advertising banners Easy Plan 2 is a device for welding tarpaulins, awning fabrics and advertising banners.

Welding width:	20 and 30mm
Power:	4000 W
Voltage:	230 V
Temperature:	20° to 700° C
Speed:	up to 18 m/Min.

Optional accessories

Partnumber:

23007	20 mm welding nozzle
30237	40 mm welding nozzle
23317	45 mm welding nozzle
23008	hem welding accessoires 20 and 30 mm
23319	hem welding accessoires 40 and 45 mm
23356	tape welding kit 50 mm

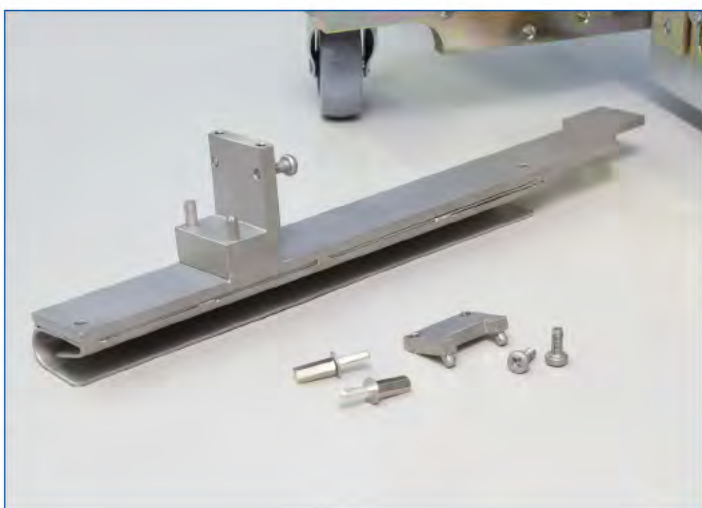

Technical errors and omissions excepted.

EASYPLAN II

The automatic welding machine Easy Plan 2 is an efficient and agile machine for welding tarpaulins, awning fabrics and advertising banners. It is able to produce seams overlapping 20 or 30 mm.

By adding an optional seam welding set, the system can also be used to produce 20 mm and 30 mm seams.

To adjust the welding process to a wide variety of different materials, the welding temperature can be fine-tuned between 20 and 700 °C.

Turning the welding head into its operating position will automatically activate the machine. The built-in motor resembles the very latest technology. It allows a processing speed of up to 18 meters/min. which can be adjusted individually. In combination with a special hold down device this ensures high-quality welding results without creases.

Safe positioning of the tarpaulin is achieved by a three-point support. Thanks to a new generation of nozzles, fabrics can be welded at an operating speed of up to 11 meters/min.

In addition, the system features a solid carrying handle and a telescopic guide which can be adjusted individually to the operator. Due to its highly agile and slim design, Easy Plan 2 offers superior characteristics for producing automobile tarpaulins and advertising banners.
