

EMBLEM Green Vision Alder

The Green Vision Alder emblem is a frontlit banner for demanding applications. It has no curl effect due to its high-performance polyester fabric. The printability and colour reproduction are excellent. Typical applications are POS advertising, roll-ups, displays and ceiling hangers.

Matchcode:	EGV-ALDER
Material:	coated polyester fabric, PVC free
Finish:	satın
Color:	white
Weight:	320 g/m ²
Tear strength:	2290 / 2180 N/5 cm to ISO 1421
Tear resistance:	730 / 690 N/5 cm DIN 53363
Fire behaviour:	not easily flammable - B1 – acc. DIN 4102
Standard roll widths:	1060 / 1372 / 1600 mm, other widths on request
roll length:	25 m
Storage:	cool and dry at 10-30 °C, 50 % relative humidity
Shelf life:	12 months in original packaging, stored horizontally

COMPATIBLE INKS:

Eco Solvent:	yes	UV:	yes
Solvent:	yes	Latex:	yes

Different printers, inks, resolutions and printing qualities result into numerous different printing parameters. In addition, there are numerous factors influencing processing and the application of our materials. For this reason, we cannot make specific statements as to drying times and maximum ink absorption. For this reason, we recommend you to perform own tests in order to verify the desired results. Our product specifications are not to be understood as legally binding guarantees assuring specific characteristics. Any liabilities and guarantees, as well as claims for compensation beyond the value of the product itself are excluded.

EMBLEM Green Vision Alder

Description:

The Green Vision Alder emblem is a frontlit banner for demanding applications. Based on a high-performance polyester fabric, the banner has high dimensional stability and tear resistance. The matt surface minimises light reflections and shows a homogeneous structure of the fabric. The Green Vision Alder emblem can be printed with standard solvent, eco-solvent, latex and UV inks and enables brilliant colour reproduction.

As it has no curl effect, it is particularly suitable for roll-ups and free-hanging banner applications. The main application for this banner is short and medium-term outdoor advertising. The Green Vision Alder emblem is flame retardant (DIN 4102-1). It is therefore perfect for indoor use.

Processing:

The material is versatile: it can be eyeleted, welded, glued and sewn. For outdoor use, make sure that the distance between the eyelets on eyeleted banners is based on the expected load, e.g. wind or dead weight. The volatile VOCs contained in solvent, eco-solvent and latex inks must be completely dried out before further processing. The ink application is decisive for the drying of the printed medium; check the device and temperature settings by means of a test print. Use cotton gloves to avoid fingerprints.

Application:

Typical applications include indoor and outdoor advertising, POS advertising, roll-ups, displays and ceiling hangers.
