EASYLAM 160TC

New and innovative

Thanks to the new ergonomic inclined design of the laminator - in the style of the EASYLAM 160TW - we have achieved an improved working position in front of and behind the laminator.

Thanks to the innovative ball-bearing axle support with tongue and groove system, adjusting the material axles is child's play. You can look forward to smooth and efficient working without losing valuable time.

The new, reinforced brakes with full-surface brake springs, give you full control over the laminating process. The enlarged, ergonomic control knob allows for comfortable operation.

With the new fifth material axis, specially developed for application tape, you are ideally equipped to process app film and paper effortlessly.

The EASYLAM 160TC laminator not only offers you an outstanding design and numerous innovative functions, easy handling and maximum safety in busy everyday operation. Features such as the integrated foot switch on the rear for easy closing of the rollers, optimised table markings on the support table for easy positioning of the media, as well as a roller holder on the front, allow user-friendly operation.

Discover the world of professional laminating! Increase your efficiency right from the start and experience with the EASYLAM 160TC how easy and perfect laminating can be.

Optional extension: Longitudinal cutter

Experience precise longitudinal cuts with our two adjustable and tiltable cutting heads. You also have the option of using additional cutting heads to maximise your flexibility and save time. This tool can be retrofitted to the EASYLAM 160TC at any time.
