Different printers, inks, resolutions and printing qualities result into numerous different printing parameters. In addition, there are numerous factors influencing processing and the application of our materials. For this reason, we cannot make specific statements as to drying times and maximum ink absorption. For this reason, we recommend you to perform own tests in order to verify the desired results. Our product specifications are not to be understood as legally binding guarantees assuring specific characteristics. Any liabilities and guarantees, as well as claims for compensation beyond the value of the product itself are excluded.

EMBLEM Production Banner 440 Semi Matt

Description:

EMBLEM PROBA440SM is a laminated PVC banner with a brand polyester fabric core. It has been developed to be used as a frontlit advertisement. The white, semi matt surface enables excellent color reproduction. The structure on the back prevents the banner of sticking together in a rolled-up state. PROBA440SM can be printed with common solvent, eco solvent, latex and UVC inks.

It can be used in many applications for short-term advertising.

Processing:

The material can be eyed, welded is stickable and sewable. It is necessary that eyelets are placed in a distance which is proportionated to the expected wind load and own weight of the banner.

Please take care that the banner is fixed at the full width to the core caused for technical reasons.

Application:

The main use of this banner is short-term advertising.
