

## EMBLEM Monomeric Vinyl Matt 100 Mini Dot

EMBLEM Monomeric Vinyl Matt 100 Mini Dot consists of a white, monomeric soft PVC film with a matt surface. The acrylic adhesive applied in dots allows efficient and bubble-free application. The back of the film is covered with a PE liner on the back.

Matchcode:	<b>MOVIMA100MD</b>		
Material:	soft PVC film, monomeric		
Finish:	matt		
Color:	white		
Thickness:	100 µm		
Adhesive:	semi-permanent acrylic adhesive as dots		
Liner:	Double-sided PE liner, 140 g/m <sup>2</sup> ,		
Adhesion:	> 24h 1.5N / 25mm - acc. to AFERA 4001		
Application temperature:	> +15 °C		
Standard roll width:	1370 mm		
Standard roll length:	50 m		
Durability:	short term outdoor applications under Central European climate conditions		
Storage:	cool and dry at 18-25 °C, 40-65 % rel. humidity		
Shelf life:	12 months in original packing		
Compatible Inks:			
Eco solvent:	yes	UVC:	yes
Solvent:	yes	Latex:	yes

Different printers, inks, resolutions and printing qualities result into numerous different printing parameters. In addition, there are numerous factors influencing processing and the application of our materials. For this reason, we cannot make specific statements as to drying times and maximum ink absorption. For this reason, we recommend you to perform own tests in order to verify the desired results. Our product specifications are not to be understood as legally binding guarantees assuring specific characteristics. Any liabilities and guarantees, as well as claims for compensation beyond the value of the product itself are excluded.

## EMBLEM Monomeric Vinyl Matt 100 Mini Dot

### Description:

EMBLEM Monomeric Vinyl Matt 100 Mini Dot consists of a white, monomeric soft PVC film with a matt surface. The EMBLEM MOVIMA100MD can be printed with standard eco-solvent, solvent, latex and UV-curing inks. The special feature of this film is the dot-shaped adhesive. This makes it possible to apply the printed film without tools and bubble-free when dry.

Easy Pin media are often used as window graphics, for seasonal retail advertising and for short-term indoor applications. Many smooth surfaces are suitable substrates for EMBLEM MOVIMA100MD. Simple and easy removal from most surfaces is ensured by the semi-permanent adhesive. The semi-permanent adhesive can be easily repositioned during application. The film can also be used outdoors for short periods. The durability depends on the location and position of the application and does not relate to the print.

### Processing:

Films with Easy Pin adhesive are applied using the dry method. Substrates for bonding should be smooth, flat and without defects. Furthermore, the substrate to be bonded must be carefully cleaned of dirt, dust, grease, etc. A compatibility test between the film and the substrate is recommended. A compatibility test between the film and the substrate is recommended.

If the prints are not sufficiently dry, the adhesive may be adversely affected. The use of cotton gloves is recommended to avoid fingerprints.

### Application:

Typical applications are short-term indoor and outdoor advertising messages and displays.
