

EMBLEM GLUE EX HEAVY

Glue Ex Heavy dissolves persistent contaminations in a natural way. The special advantage of this cleaner is that a big part of its ingredients are based on renewable raw materials and not on oil. These natural ingredients stand out due to their extreme dissolving power over persistent contaminations. It is a full-fledged alternative to solvents containing VOC and/or irritating substances. An extremely thin layer will suffice for removing contaminations.

The Glue Ex Have delivers an optimal performance in combination with employee protection and a reduction of the environmental impact. Persistent greases, anti-rust waxes, adhesive residues, bitumen, tectyl, silicone, sealing compounds, rubber, persistent carbonizations – the products of thermal decomposition of synthetic materials and oil –, and many more can be removed efficiently from ball bearings, worm drives, cylinders and nozzles. Burnt-in oil layers are dissolved and removed safely from gearboxes and motors. Due to its characteristics, the cleaner will evaporate more slowly than conventional solvents. This results in longer exposure times, and hence high effectiveness and efficiency. It won't leave any oily residues on the cleaned surfaces.

Product:	EMBLEM Glue Ex heavy
Item no:	25647
Property:	VOC reduces NSF certified
Hints:	Rinse with water after cleaning
Other marking:	NSF - sign = Universalreiniger der lebensmittelindustrie
Cleaning focus:	For removal of persistent adhesives, greases, bitumen, tectyk, silicon, rubber etc.
Cleaner property and containers:	clear liquid in spray bottle
Identification:	Classification of the substance or mixture classification in accordance with regulation (EC) No 1272/2008 [CLP]: None
Transport:	No dangerous goods
Protective equipment:	

With its high flash point (> 100° C/212° F), the grease dissolver enhances safety during application. The reduction of VOC provides for very low fume emission while applying which means low employee exposure and low environmental pollution.

EMBLEM

Glue Ex Heavy is ready for use in manual applications or immersion processes (also recyclable). Just spray on a thin layer and wipe it off with an absorbent cloth after a short exposure time. The cleaned surface will then virtually be residue-free.

- VOC-reduced, non-flammable
- An alternative to VOC-containing and/or irritant solvents
- For the removal of very strong contaminations, such as oils and greases, bitumen, lubricants, anti-corrosion waxes, resins, rubber residues and -marks, and paint
- For the removal of burnt-in oil layers from gearboxes and motors
- For the removal of protective film and adhesive residues
- High flash point (> 100°C/212°F)
- Very economical, an extremely thin layer will suffice
- Excellent cleaning effect also in the cold
- Pleasant odor
- No labelling required in accordance with the CLP Regulation

Label-free cleaner with extremely high dissolving power Ready-to-use cleaner based on renewable raw materials with an extremely high dissolving power. EMBLEM Glue Ex Heavy is an effective alternative to solvents containing VOC and or other irritating substances. The cleaner removes carbonizations, persistent greases, anti-rust waxes, adhesive residues, bitumen, tectyl, silicone, sealing compounds, rubber, and many more.

- For the removal of very strong contaminations
- VOC-reduced, non-flammable
- High flash point (> 100° C/212° F) enhances safety during application
