Dye:	yes	Latex:	yes
Pigment:	yes		

Different printers, inks, resolutions and printing qualities result into numerous different printing parameters. In addition, there are numerous factors influencing processing and the application of our materials. For this reason, we cannot make specific statements as to drying times and maximum ink absorption. For this reason, we recommend you to perform own tests in order to verify the desired results. Our product specifications are not to be understood as legally binding guarantees assuring specific characteristics. Any liabilities and guarantees, as well as claims for compensation beyond the value of the product itself are excluded.

Trend Textil Banner Lite FR New Generation

Description:

EMBLEM Trend Textil Banner Lite FR New Generation consists of a lightweight polyester fabric.

The coating of the TTBLFR-NG enables colour-intensive prints with common dye and pigment inks.

TTBLFRNG is flame retardant so it can be used in a variety of indoor applications, e.g. as decorative banners for shop windows and shopfitting. The fine structure of the matt surface makes reflection-free prints possible.

Processing:

During further processing, the material must be used in a way that is appropriate for the subsequent application. Particularly with eyelet banners, the distance between the eyelets must be appropriate for the application.

To avoid fingerprints, it is advisable to wear cotton gloves.

Applications:

Decorative banners for shop windows and shopfitting.
